A partial list of products made from Petroleum (6000 items). One 42-gallon barrel of oil creates 19.4 gallons of gasoline. The rest (over half) is used to make things like: Although the major use of petroleum is as a fuel, (gasoline, jet fuel, heating oil), and petroleum and natural gas are often used to generate electricity, there are many other uses. Here are some of the ways petroleum is used in our every day lives. All plastic is made from petroleum and plastic is used almost everywhere: in cars, houses, toys, computers and clothing. Asphalt used in road construction is a petroleum product as is the synthetic rubber in the tires. Paraffin wax comes from petroleum, as do fertilizer, pesticides, herbicides, detergents, phonograph records, photographic film, furniture, packaging materials, surfboards, paints, and artificial fibers used in clothing, upholstery, and carpet backing.

Movie film

Vitamin capsules

Pillows

Ice chests

Candles	Rubbing alcohol	Loudspeakers	Ice buckets
Boats	Ice cube trays	Credit cards	Fertilizers
Crayons	Insect repellent	Water pipes	Toilet seats
Caulking	Roofing shingles	Fishing boots	Life jackets
Balloons	Shower curtains	Garden hose	Golf balls
Curtains	Plywood adhesive	Umbrellas	Detergents
Milk jugs	Beach umbrellas	Rubber cement	Sun glasses
Putty	Faucet washers	Cold cream	Bandages
Tool racks	Antihistamines	Hair coloring	Nail polish
Slacks	Drinking cups	Guitar strings	False teeth
Yarn	Petroleum jelly	Toothpaste	Golf bags
Roofing	Tennis rackets	Toothbrushes	Perfume
Luggage	Wire insulation	Folding doors	Shoe polish
Fan belts	Ballpoint pens	Shower doors	Cortisone
Carpeting	Artificial turf	Heart valves	LP records
Lipstick	Artificial limbs	Hearing aids	Vaporizers
Aspirin	Shaving cream	Wading pools	Parachutes

Americans consume petroleum products at a rate of three-and-a-half gallons of oil and more than 250 cubic feet of natural gas per day each! But, as shown here petroleum is not just used for fuel.

The world's top five crude oil-producing countries are: Saudi Arabia, Russia, United States, Iran, and China

Over one-fourth of the crude oil produced in the United States is produced offshore in the Gulf of Mexico. The top crude oil-producing states are: Texas, Alaska, California, Louisiana, and Oklahoma.

About 59.5 percent of the crude oil and petroleum products used in the United States come from other countries.
